Food Service Wrap Up

- Supply chain issues continuing this year
 - Did not receive some items in every order placed
 - Requires substitutions to the menus
 - Message is on our web page about the supply chain issue so that parents are aware
- Food service team has become efficient and flexible with supply chain and labor shortages while still giving students healthy meal choices
- As students get familiar with using the point of sale again, we anticipate increased participation
- If approved, free meals for all students would allow for greater participation and access to healthy meals
